

[Omron CJ Series PLC Level 1](#)

Downloaded on Wednesday 8th February 2012

Software	CX Developer / CX One
Duration	5 Days
PLC-Type	Omron CJ Series
Pre-Requisites	No prerequisites this is a beginners course
Maximum Delegates	6

Brief Description

- * Be able to recognise C series hardware and be able to replace modules when a fault occurs.
- * Be able to operate the Omron CX Developer software to make it perform certain tasks.
- * Understand basic instruction set and be able to make minor modifications to software.
- * Be able to backup and restore a PLC program when required.
- * Be able to perform basic system diagnostics when a problem occurs.

Course Documentation

- * Training Log
- * Pre Course Exercises
- * Course Exercises
- * Post Course Exercises
- * Filofax Pocket Reference Guides

Course Content

To fault find a system you need to know EXACTLY how it works HOW EXACTLY DOES A PLC WORK?

- * Am I getting the input to the PLC?
 - * The Led on the output card means i am getting voltage out right? does it?
 - * What exactly happens in between? ,theres more than just a program in the CPU
 - * How exactly does it scan the program?
 - * What is this Watchdog Timer? Is it that important?
 - * Can I use the same output twice? That's bad programming isn't it?
 - * A PLC is a logic controller, so use a logical approach to fault find it.
 - * What are the 8 simple test points to check?
 - * The PLC is in RUN, that means theres a program right? does it?
 - * FORCING a bit and toggling a bit is pretty much the same yeah? depends on which PLC
- Then you need to Know the specifics HOW DO I DO THE FOLLOWING? (some straight forward some not so)
- * Identify component parts of the C Series PLC system
 - * I/O addressing and configuration
 - * Memory organization
 - * System connection
 - * Understand and interpret system LED's

www.equinoxac.co.uk

- * Modes of operation
- * Communicating with the PLC
- * Addressing
- * Contact and relay-type instructions
- * Timer and counter instructions
- * Program control instructions
- * Comparison instructions
- * Maths instructions
- * Force functions
- * Search functions
- * Save function
- * Replacement of battery, I/O modules and CPU
- * Fault find simple software problems
- * Fault find simple hardware faults
- * Interpret cross references & printouts
- * Generation of documentation to assist fault finding

Equipment

- * CJ Series PLC
- * PC or Laptop
- * Simulator

Solutions, Not Courses.
